## IMPORTANT NOTES:

- Fusion is mandatory on chassis with three or less axles.
- <sup>#</sup>Fusion is optional on chassis with 4 or more axles. An allowance forward of the bumper/bullbar of 30mm for the fusion radar unit is required for these configurations.
- All frame dimensions are measured to the top of the frame using 270mm rails. Illustrations provided depict varying configurations for demonstration purposes only. Actual dimensions may vary due to differences in tare weight resulting from fitting of optional equipment, postproduction build-up, and fuel loads. On heavy-duty trucks, dimensional variations of up to ±25mm may occur.
- Vehicle heights have been calculated with tyres in an unladen condition; unless otherwise specified, Bridgestone tyres have been used for these calculations. Variations may result when tyres from alternative manufacturers are fitted.
- For more information on the full range of available options, please contact your authorised Kenworth dealer or visit [kenworth.com.au](http://kenworth.com.au)
